- Ideal for windowsill growing
- Tasty served with mustard

Sow  Plant out  Harvest

[Sowing Calendar: Blue for Sow, Green for Plant out, Yellow for Harvest]											
Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

**SOWING AND GROWING**

Sow in trays or punnets of moist compost or moist flannel/ blotting paper indoors at intervals throughout the year. Scatter the seed liberally but not too thickly on to the surface. Cover the tray with paper until the seedlings are 25mm (1") high. Cress is ready to cut when the stems are 50mm (2") high. Keep moist at all times. Ready in just 6-8 days. This is the true cress, having a hotter taste than punnet bought "cress".

**SPEEDY VEG** Ready to eat in just **1 week**

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
