

SUTTONS

Growing your own veg...
made simple!

The easy way to sow seeds

- Pre-spaced seeds in a tape — less 'thinning' out!
- 5m (16½') of tape
- For outdoor growing

ROCKET

SOW: Apr-Jun
HARVEST: Jun-Sep

Growing your own veg... made simple!

ROCKET

Quick-growing 'tangy' salads
5m (16½') of seed tape

Rocket seedling

How to grow your rocket...

- 1 Choose a sunny spot in the garden with weed-free soil. Dig and rake the soil to a fine crumbly surface.
- 2 Using the corner of a hoe or rake draw a groove into moist soil.
- 3 Roll out the tape along the groove.
- 4 Cover with soil. Keep the soil moist. Watch your rocket grow — it's *GrowEasy*!
- 5 Thin the seedlings by degrees to around 20cm (8") apart. (You can use the thinnings for salads.)

- If growing more than one row, allow 30cm (12") between rows.
- For a constant supply of rocket sow at two weekly intervals.
- Remember, you can cut the tape to suit row length.
