"Growing vegetables can be fun and very rewarding. Not only do you get that 'fresh from the garden taste', but also genuine health benefits, since freshly picked vegetables are the highest for vitamin content. Try my organically produced seed and get a taste for gardening"

- Organically produced seed
- Excellent flavour

Sow Plant out Harvest

Year 1												
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Year 2												

sowing & growing
Sow thinly direct into a finely raked seedbed at a depth of 13mm (½") in rows 30cm (12") apart. When ready to transplant make holes with a dibber 10-15cm (4-6") deep, 23cm (9") apart, drop a plant into each and fill with water to settle soil around the roots. Allow 38cm (15") between rows. To blanch draw up earth to stems as growth develops. Leeks do well on moist soils especially if well prepared. Use an organically produced fertiliser.

quality control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Standard Seed.
EC rules and standards.
