"Growing vegetables can be fun and very rewarding. Not only do you get that 'fresh from the garden taste', but also genuine health benefits, since freshly picked vegetables are the highest for vitamin content. Try my organically produced seed and get a taste for gardening"

• The best variety for autumn sowing • For fresh use or freezing
• Organically produced seed

sowing & growing

Prepare soil by digging and raking and sow seeds at a depth of 50mm (2"), spacing the seeds 15-23cm (6-9") apart. Sow in double rows allowing 23cm (9") between the two lines forming each row and 60-90cm (24-36") between the double rows. May also be sown in pots or trays of compost on a windowsill or in a greenhouse for eventual planting outside. Grows best in a sheltered site, but not shaded, in well drained soil.

quality control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
